

# TAKEAWAYS FROM THE EDITORIAL

"Health Psychology in the Time of COVID-19"

## ESSENTIAL EXPERTISE

Health psychologists have essential expertise on the main mitigation and prevention strategies for COVID-19, as many of these strategies are behavioral.

## INCREASE VISIBILITY

We must increase the visibility of health psychologists as experts with specialized knowledge in these areas.

## ENCOURAGE AND SUPPORT

In the future, we must encourage and support health psychologists to engage in a meaningful way with infectious diseases.

## POTENTIAL LONG-TERM SEQUELAE

Infectious diseases have long-term health consequences. The continued involvement of health psychologists on the long-term sequelae of COVID-19 will be an important area of future research.
